

So here we go again. Powerful lobbyists more concerned with profit than the inherent freedom of the American people. Why should the NAB be concerned with what I listen to? One answer- profit!. The AM/FM broadcasters (read Clear Channel) want to limit my options that I have every right to. Even considering NAB's petition 04-160 once again shows the government's total disregard for the will of the people when big money talks. What's next? My cable TV company will not be able to broadcast the Weather Channel because it contains local information? Oh wait, that would be Time-Warner....and nobody messes with them. I urge you at the FCC to deny the NAB's petition.
